

PL-200: HYDROPHILIC FUMED SILICA

PL-200 is an effective hydrophilic fumed silica providing excellent gloss and rheology control in inks, coatings, adhesives gel coats and resins.

Typical Applications: PL-200 can be used in a variety of systems including UV, solvent or water based systems for both rheology and gloss control. It also provides anti-settling properties in pigmented systems.

Performance Properties:

- Excellent rheology control
- Very good anti-settling characteristics
- Better anti-caking control

TYPICAL PROPERTIES

Appearance	White fluffy powder
Surface area	200 M ² /g
Particle size	12 nm
Melt Point	192-208°C
Density	50 g/l
Usage Levels	0.5 - 20%
